 • Elliptical Type Stylus

OUR HISTORY

ALMOST A CENTURY OF TRADITION

In 1920, Powel Crosley founded the company that pioneered radio broadcasting and mass-market manufacturing around the world. Dismayed with the \$130 price tag for the radio receiver he promised to buy for his son's birthday, Crosley decided to make his own. Upon successfully building a working set for only \$35, Crosley was quick to spot the mass market potential.

It was a simple idea: design a fully-functioning radio, meticulously craft each unit with obsessive detail and precise accuracy, and *of course* add a measure of consideration for the wallet. This simple idea led Crosley to become the world's largest radio manufacturer, while Powel Crosley became known as "The Henry Ford of Radio".

Today, the Crosley name lives on with superbly detailed replicas that truly transcend time. Reintroductions of original vintage radios and turntables feature the newest technologies graced by unforgettable Crosley style. Rich lines, retro designs, and authentic crafting have made Crosley today's premier vintage electronics manufacturer. True to the Crosley tradition, these replicas are as fabulous as they are functional, providing a delightful dose of nostalgia.
